Bref

Front-end Engineer with 2+ years of experience building scalable web applications using React.js, Next.js, and TypeScript. Experienced in full-stack development (Node.js, Express.js, MongoDB) and integrating AI tools to enhance workflows. Delivers high-performance solutions in fast-paced startup environments.

Experience

Frontend Engineer, LAUNCH WORKZ   11/2023 – Present
                                                                                                                   remotly

- Transformed 100% of Figma designs into pixel-perfect, production-ready code using React.js and Next.js with full cross-browser compatibility
- Collaborated with backend engineers to integrate APIs and deliver seamless features, reducing bugs through proactive communication and thorough testing
- Conducted code reviews for junior developers, sharing React best practices and development patterns to improve overall team code
- Identified critical edge cases in product features and documented findings, working with cross-functional teams to prevent production issuesquality

Recent Projects

Direct Rent, https://app.directrent.com/   11/2023 – Present
wep app for renting items for clients in the United States
i used React,redux-toolkit, redux,redux-persist, formik, redux-persist, i18next,swiper, react-icons", react-infinite-scroll-component,react-infinite-scroll-component,axios,@vis.gl/react-google-maps 🔗 ,@mui/material , @react-oauth/google, @sentry/react,stripe,dayjs and react-share in this project

My-portfolio, https://dev-mahmoud-portfolio.vercel.app/   2025 – 2025
This is my portfolio, which I created to showcase my work history, skills, education, and detailed information about all my projects, as well as my CV and social media accounts. I developed a backend for the portfolio and integrated a dashboard to manage my content easily, avoiding complex coding for content changes.
The skills I used include:
- @emailjs/nodejs - @sentry/nextjs - clsx - framer-motion -jsonwebtoken
- Next.js - React.js - react-hook-form - react-icons - react-toastify - zod
- Node.js - Express.js - MongoDB - bcryptjs - cors - mongoose - multer
- dotenv - pre-commit - husky

Skills & abilities

TECHNICAL SKILLS
- Front-End Development: HTML/HTML5, CSS/CSS3, SASS, JavaScript/ES6, Typescript, React.js, Next.js, Material-UI, Tailwind CSS, Bootstrap, DaisyUI.
- State Management: Redux, React Query, Zustand, Context API.
- Form Handling: Formik, React-Hook-Form, Zod, yup.
- Back-End Basics: Node.js, Express.js, MongoDB, REST APIs.
- Version Control: Git, GitHub.
- Performance Optimization: Lighthouse, Code Splitting, Lazy Loading.
- Deployment : Vercel, Netlify, CI/CD pipelines.

Soft Skills

Problem-Solving - Effective Communication - Team Collaboration - Creativity and Innovation - Strategic Planning and Organization - Quick Learning - Leadership and Decision-Making - Adaptability to Change - Time Management - Conflict Resoluti

Education

Bachelor's Degree in Computers and Artificial Intelligence,   2019 – 2023
SOHAG UNIVERSITY - (IT department)
- Department: Information Technology
- Grade:very good

Languages

Arabic — Native/Bilingual   **English** — Proficient
